

INVISIBLE SHIELD® PRO 15 APPLICATION & PERFORMANCE WARRANTY

Midwest Glass Fabricators is a certified installer of the Invisible Shield PRO 15 application to protect glass.

The *INVISIBLE SHIELD® PRO 15* Protective Glass Coating is a solvent-extended coating designed for the preservation, enhancement and preventive cleaning of glass used in architectural applications both commercial and residential including windows, building facades, glass entrances, walls and partitions, balustrades, shower enclosures, glass block and mirrors. It improves the natural characteristics of the glass without changing its physical appearance or transparency. Invisible Shield PRO 15 preserves and protects glass against excessive exposure to weather/moisture, heat and humidity that can result in corrosion to the glass, which makes the glass appear dirty and stained. It makes the glass easier to maintain, improves the clarity and overall appearance of the glass. The Invisible Shield PRO 15 creates an anti-corrosion, scratch-resistant “barrier” on the glass surface that aids in longer life to the finished product.

INVISIBLE SHIELD PRO 15 has been manufactured to the highest standards and specifications. It is safe, easy to use, long lasting and storage stable. It should be handled and applied as directed on its product labels and data sheets, and/or Reach GHS-Compliant Safety Data Sheets.

PRODUCT APPLICATION: Prior to applying Invisible Shield PRO 15, the glass must be thoroughly cleaned and dried to remove any existing dirt, grime, water spots, mineral deposits, or other stains. Be sure to thoroughly rinse and dry the entire glass surface to be treated to remove any excess soil, moisture, film or residue. Once the glass has been thoroughly cleaned and dried, follow these 3 easy steps to apply the Invisible Shield PRO 15 Protective Glass Coating:

(Step 1) – Spray Invisible Shield PRO 15 evenly and directly onto the glass surface using an air or airless operated fine mist sprayer, or apply the product to a clean soft cloth, microfiber towel or padded tool to distribute the product directly and evenly onto the surface using a firm, circular and overlapping (polishing) motion for optimum coverage and performance.

(Step 2) – Allow the product to dry for 2-3 minutes, or until a slight haze has formed. For optimum protection and to ensure complete coverage, reapply the coating.

(Step 3) – Polish the glass with a clean, dry soft cloth or microfiber towel or pad until crystal clear. To remove any excess haze, simply spray or rinse the glass with clean water and wipe until clean & dry.

PRODUCT MAINTENANCE: The Invisible Shield PRO 15 Protective Glass Coating is extremely durable and provides continuous protection under most conditions. Although the glass is protected against water, heat and high humidity, the glass is NOT self-cleaning. As with any anti-corrosive glass product or solution, the glass must be cleaned and maintained periodically. Windows and building facades should be cleaned on a routine, semi-annual or quarterly basis commensurate with the level of soiling and exposure to weather, dirt, sand, pollution, salt or other environmental contaminants. Glass in shower enclosures and other interior applications should be cleaned on a routine basis

(weekly) using a traditional ammonia-free glass cleaner and commensurate with its use and exposure to dirt, grime, soap, hard water and minerals. The Invisible Shield PRO 15 GLASS COATING is unaffected by normal cleaning with non-abrasive soaps or detergents.

PLEASE FOLLOW THESE SIMPLE CLEANING GUIDELINES TO ENSURE THE QUALITY OF YOUR PRODUCT:

- 1) **DO NOT USE** abrasive (gritty) cleaners of any type, such as but not limited to Soft Scrub®, Ajax® Bar Keepers Friend® or Comet®. Regular use of a squeegee can also be abrasive and is not recommended, as it will accelerate the wear of the protective coating.
- 2) **DO NOT USE** acids, alkalis, or other strong chemical agents on the protected surface.
- 3) **DO NOT USE** abrasive cleaning pads or brushes, scrappers, razor blades, or other sharp tools on the protected glass. While the protective coating makes the glass scratch-resistant, it is NOT scratch-proof.
- 4) **ALWAYS USE** a clean soft cloth, pad or paper towel to clean the glass.
- 5) **ALWAYS USE** compatible cleaning agents, such as a traditional ammonia-free glass cleaner. We recommend Unelko's REPEL® Glass & Surface Cleaner to periodically clean & maintain the glass.

PERFORMANCE WARRANTY: Unelko warrants Invisible Shield PRO 15 for up to 15 years from the date of application on interior and exterior applications. When applied and maintained as directed, the product will protect against visible corrosion.

PRODUCT WARRANTY: Unelko warrants Invisible Shield PRO 15 to the original purchaser when used, applied and maintained as directed. This warranty is NOT transferable. The product warranty does not extend to or cover misapplication or misuse of the product. Including the use of abrasive or harsh chemicals, improper application/cleaning tools, excessive soiling from lack of cleaning and neglect; and wear and tear resulting from prior damage and exposure to excessive weathering and/or abrasion. Please refer to the maintenance guidelines shared on this page.

If INVISIBLE SHIELD PRO 15 fails to perform in the manner represented, Unelko will furnish the Original Purchaser enough product for re-application to the specific treated area in dispute. The Invisible Shield PRO 15 can be infinitely renewed if necessary—and depending upon use and exposure, without removing the prior application/treatment, and without any risk of buildup. Invisible Shield PRO 15 will never crack, peel, discolor or build-up.

To activate this warranty, the Original Purchaser must register the product use and application with Unelko online within 30 days at www.GlassCareExperts.com

STATEMENT/EXCLUSIONS: The expressed warranty set forth in this agreement is in lieu of all other warranties, expressed or implied, including and without limitation to any other warranty of product fitness for a particular application and/or purpose. Unelko will not be liable or responsible for any damages or costs associated with the warranty, including any labor or equipment cost associated with re-application of the product by the original purchaser as registered, for the intended application area.
